An implementation plan, which must include appropriate activity level planning, needs to include prioritization and the resources necessary to make it reality. Without the appropriate amount of funding, of which there is no mention in this report, it will be impossible to implement anything. Of particular issue, is the lack of residential property or rent/lease increases which would be essential if the TP recommendations related to increased opportunities are to happen. Where wil people be able to live if there is no money allocated to new residential development?
