While there is much in the report talking about "Value-based outcomes", how do you plan on measuring these? There are also no specifics regarding the assessment tool, and it would be helpful if families and those served could see it before it is utilized..

There are some good recommendations, except there is really no substance, no detail and no specific means of accountability.

There is no specific implementation plan, no talk of cost or rate plans or how NYS will pay for all of this, as well as no dates for implementating any of this.

Finally, the comment period is way to short, and almost feels like it was purposely done to minimize anyone from actually having the time to make comments.

Thank you,

Michael Bolton
